WEEKLY WEATHER BULLETIN

Of the Missouri Experiment Station at Columbia for the Week Ending Last Monday

The week ending Monday morning, May 6th, was unusually cold and stormy, with more than the usual amount of precipitation. The temperature deficiency was most marked in all counties, averaging about 14 degrees per day. A snowstorm of marked severity prevailed over the larger part of the western and northern portions of the state on the 3rd, and in some of western and northwestern counties the ground was covered to a depth of 3 to 7 inches. Minimum temperatures ranged from 32 degrees to 25 degrees, being the lowest ever recorded in May.

The precipitation was above the average in all divisions, and in many counties it was excessive. The total fall for the week ranged from 2.50 in the Ozark region to over 3 inches in the southeastern lowlands; and generally from 1 to 2.50 inches north of the Missouri river. The ground is now full of water and all work is at a standstill.

LACLEDE, - MISSOURI

HERE you have a single-breasted and a double-breasted sack suit as made by The House of Kuppenheimer. A selection of either one of these garments is largely a matter of personal preference.

A sack suit, you know, is the kind you see most often. All manufacturers make them—in a way—but to get a garment of this kind, which because of its style and tone is not commonplace and has not that ordinary "everybody-and-everywhere" appearance, there is but one course to pursue.

Come to us. Simply because we are the exclusive representatives of The House of Kuppenheimer, makers of the finest suits and overcoats for men. We invite your inspection.
